CONTENTS

Number 1

Faisal Khalil Ibrahim	1	The effects of stress ratio, compressive peak stress and maximum stress level on fatigue behaviour of 2024-T3 aluminium alloy
A. K. Azad, M. S. Mirza and P. Chan	9	Fracture energy of weakly reinforced concrete beams
M. Al Mundheri, P. Soulat and A. Pineau	19	Irradiation embrittlement of a low alloy steel interpreted in terms of a local approach of cleavage fracture
J. LLorca and V. Sánchez-Gálvez	31	Fatigue limit and fatigue life prediction in high strength cold drawn eutectoid steel wires
U. P. Singh and S. Banerjee	47	Crack closure and fatigue crack growth rate in three point bend specimens of different widths
Chingshen Li	59	Vector CTD criterion applied to mixed mode fatigue crack growth
L. P. Pook	67	*Technical Note:* Unacceptable differences in published stress intensity factor solutions
A. J. McEvily	71	*Discussion*
R. O. Ritchie, W. Yu, A. F. Blom and D. K. Holm	73	*Response*
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VI	New Patents

Number 2

Akito Nitta, Takashi Ogata and Kazuo Kuwabara	77	Fracture mechanisms and life assessment under high-strain biaxial cyclic loading of Type 304 stainless steel

R. Yuuki, K. Akita and N. Kishi	93	The effect of biaxial stress state and changes of state on fatigue crack growth behaviour
G. C. Li, T. Guennouni and D. François	105	Influence of secondary void damage in the matrix material around voids
H. Burlet, S. Vasseur, J. Besson and A. Pineau	123	Crack growth behaviour in a thermal fatigue test. Experiments and calculations
G. B. Thomas, R. Hales, J. Ramsdale, R. W. Suhr and G. Sumner	135	A Code of Practice for constant-amplitude low cycle fatigue testing at elevated temperatures
Ji-Liang Doong and Chun-Sheng Chen	155	Fracture toughness of bainitic nodular cast iron
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VII	New Patents

Number 3

W. O. Soboyejo, K. Kishimoto, R. A. Smith and J. F. Knott	167	A study of the interaction and coalescence of two coplanar fatigue cracks in bending
P. Lukáš, L. Kunz, B. Weiss and R. Stickler	175	Notch size effect in fatigue
D. N. Gladwin, D. A. Miller and R. H. Priest	187	Crack growth rates during creep, fatigue and creep-fatigue in an austenitic feature weld specimen
D.-Z. Sun, D. Siegele, B. Voss and W. Schmitt	201	Application of local damage models to the numerical analysis of ductile rupture
M. N. James, C. Dimitriou and H. D. Chandler	213	Low cycle fatigue lives of notched components
D. P. Rooke and T. J. Courtney	227	The effect of final friction coefficient on fretting fatigue waveforms
B. G. Journet, A. Lefrancois and A. Pineau	237	A crack closure study to predict the threshold behaviour of small cracks

X. Huang and J. W. Hancock	247	A reliability analysis of fatigue crack growth under random loading
J. R. Yates and K. J. Miller	259	Mixed mode (I + III) fatigue thresholds in a forging steel
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VI	New Patents

Number 4

G. P. Leaity and R. A. Smith	271	The use of SPATE to measure residual stresses and fatigue crack growth
L. Z. Zhuang and E. W. Langer	283	Study on fatigue threshold behaviour and fatigue crack propagation in a cast Co–Cr–Mo alloy used for surgical implants
J. R. Gordon and R. L. Jones	295	The effect of specimen size on the *J* R-curve behaviour of a titanium alloy
J. R. Gordon and R. L. Jones	309	The effect of specimen size on the CTOD R-curve behaviour of a titanium alloy
Hong Youshi, Lu Yonghua and Zheng Zhemin (C. M. Cheng)	323	Initiation and propagation of short fatigue cracks in a weld metal
E. K. Priddle	333	The influence of test variables on the fatigue crack growth threshold
M. N. James and W. N. Sharpe Jr	347	Closure development and crack opening displacement in the short crack regime for fine and coarse grained A533B steel
	I	Information on Conferences/Seminars
	III	Software Survey Section
	VI	Announcement

Number 5

K. J. Kang, J. H. Song and Y. Y. Earmme — 363 — Fatigue crack growth and closure through a tensile residual stress field under compressive applied loading

A. Plumtree and Nai-yong Tang — 377 — Effect of hold-time damage on high temperature fatigue behaviour

M. Kuno, R. B. Waterhouse, D. Nowell and D. A. Hills — 387 — Initiation and growth of fretting fatigue cracks in the partial slip regime

Yang Shuilong and Lu Yizhong — 399 — Surface crack growth in a plate under the remote high strain-controlled cyclic loading

Y. Mutoh, T. Satoh, K. Tanaka and E. Tsunoda — 409 — Fretting fatigue at elevated temperatures in two steam turbine steels

R. L. Jones and P. C. Davies — 423 — Experimental characterisation of dynamic tensile and fracture toughness properties

C. Lawrence and C. Sumner — 439 — The introduction of fatigue loading into the routine testing of polyethylene gas pipe systems

R. C. McClung — 447 — Closure and growth of mode I cracks in biaxial fatigue

J. Schijve — 461 — *Discussion*

F. K. Ibrahim — 465 — *Response*

I — Information on Conferences/Seminars

III — Software Survey Section

VI — New Patents

Number 6

A. Ragab, H. Alawi and K. Sorein — 469 — Corrosion fatigue of steel in various aqueous environments

J. Yu, L. J. Xue, Z. J. Zhao, G. X. Chi and R. N. Parkins — 481 — Determination of stress corrosion crack initiation stress and crack velocities using slowly strained tapered specimens

W. Dietzel, K.-H. Schwalbe and D. Wu	495	Application of fracture mechanics techniques to the environmentally assisted cracking of aluminium 2024
F. H. Davis, E. G. Ellison and W. J. Plumbridge	511	Effects of hydrostatic pressure on the rate of fatigue crack growth
F. H. Davis and E. G. Ellison	527	Hydrodynamic pressure effects of viscous fluid flow in a fatigue crack
Faisal K. Ibrahim	543	Threshold stress intensity behaviour of cracked steel structural components
R. A. Pell, P. W. Beaver, J. Y. Mann and J. G. Sparrow	553	Fatigue of thick-section cold-expanded holes with and without cracks
E. Renner, H. Vehoff and P. Neumann	569	Life prediction for creep-fatigue based on the growth of short cracks
J. M. Cowling and J. F. Knott	585	Fatigue crack growth from small semi-elliptic hydrogen-induced cracks in QIN steel
B. K. Neale, A. B. Haines and A. G. Miller	597	The fracture behaviour of an axial crack in a pressurised pipe
B. Skallerud and P. K. Larsen	611	A uniaxial cyclic plasticity model including transient material behaviour
Din Jun and Qing Jianchen	627	*Technical Note:* On crack initiation life during low cycle fatigue
	I	Information on Conferences/Seminars
	III	Software Survey Section
